SUMMARRY

Results-driven Computer Programming student with a strong foundation in full-stack development, database management, and object-oriented programming. Proven ability to build scalable web applications using Java, React, Node.js, and MongoDB.

EDUCATION

Advanced Diploma in Computer Programming and Analysis (CPA) **Jan 2024 - Present**
Algonquin College, School of Advanced Technology, Ottawa, ON

Computer Science Pathway **Dec 2021 - Dec 2023**
Fraser International College (SFU), College of Technology, Vancouver, BC

SKILLS

- **Languages:** Java, JavaScript (ES6+), Python, SQL, HTML5, CSS3, DAX
- **Databases:** MySQL, MongoDB (NoSQL), Star Schema Modeling, ETL Processes
- **Frameworks & Testing:** React, Node.js, JUnit, Bootstrap
- **DevOps & Tools:** Git (Gitflow & Branching Strategies), Docker, CI/CD Concepts, Jira, Postman, Power BI
- **Cloud:** AWS (Foundational Services - EC2/S3), Vercel

PROJECTS

Movie Watchlist Web Application | *Node.js, Express, MongoDB, HTML/CSS* **Apr 2026**

- Developed a full-stack web application for tracking and managing user movie watchlists utilizing Node.js and MongoDB architecture to deliver responsive user experience.
- Engineered RESTful APIs with Express to handle HTTP requests, securely managing CRUD data operations and backend routing.
- Integrated a NoSQL MongoDB database for the flexible and scalable storage of user profiles and dynamic media data.

Voice AI Chatbot Front-End | React, Node.js, JavaScript, HTML/CSS **Jul 2025**

- Executed the full SDLC during a 24-hour hackathon, utilizing Agile methodologies and Jira for task tracking to deliver a functional MVP under strict deadlines.
- Developed an emotion-aware chatbot by integrating Voice APIs with a Node.js backend, handling asynchronous streams to achieve <200ms latency.
- Engineered RESTful endpoints with JSON serialization to parse complex audio data, employing Git for version control and collaboration.

Business Intelligence Dashboard | Power BI, MySQL, DAX **Aug 2024**

- Engineered a Power BI dashboard sourced from a relational MySQL database, utilizing ETL (Extract, Transform, Load), and processes to clean and model a dataset of 50,000+ records.
- Applied Star Schema data modeling principles (Fact & Dimension tables) to de-normalize data, optimizing query execution speed by 60% compared to standard flat-file retrieval.
- Wrote complex DAX expressions to calculate dynamic KPIs, automating the reporting workflow and reducing the time required for data analysis by approx. 90% (saving ~5 hours/week).

Work Experience

London Drugs (Retail Store) | Customer Service Rep \ 1 key holder | Vancouver, BC. **Nov 2022 – 2023**

- Promoted to Key Holder and E-commerce operations role; managed online order fulfillment, inventory databases, and resolved discrepancies for high-volume transactions with 99% accuracy.
- Demonstrated reliability and leadership by training new staff and coordinating logistics between the store and warehouse during peak demand periods.

Industrial Linings Ltd. | Supervisor - Warehouse Operations | Chingola, Zambia **May 2020 – 2021**

- Supervised a team of 5+ staff members, coordinating daily schedules and workflows to increase order processing efficiency by 20%.
- Modernized inventory tracking using Excel, reducing the time spent on manual stock counts by approx. 10 hours/month.
